PROFESSIONAL SUMMARY

Founding engineer who sets the technical direction and ships product from a blank repo. Shipped Harmony's agentic fintech MVP in **7 weeks** across web, mobile, and AI, now live with pilot users. Previously built React Native platforms serving **30M+ annual users** in healthcare. Generalist across React, TypeScript, Node.js, Python, and Swift with production experience integrating LLMs, MCP, and payment rails. At my best in zero-to-one environments. Open to relocate anywhere in the US.

WORK EXPERIENCE

Founding Software Engineer

May 2026 – Present

Harmony Financial Technologies | Pre-seed fintech startup

Remote

- Shipped a multi-platform fintech MVP from scratch in **7 weeks** as first engineer: chose the stack, architected the system, and owned every technical decision from blank repo to production.
- Designed the KYA (Know Your Agent) protocol powering autonomous agent-to-agent payments: agent identity verification and authorization enforcement before any funds settle between companies.
- Built the full product on React, Node.js, Supabase/PostgreSQL, Stripe, Plaid, Auth0, and Resend, plus a React Native mobile app; deployed on Railway and Vercel with CI/CD.
- Refactored a dead-code monorepo into clean frontend and backend repos, delivering **4x faster builds** on new features and **3x faster debugging** cycles.
- Live with **10 pilot users** and an active Plaid partnership; raised \$500K pre-seed on YC SAFE notes.

Software Engineer

Sep 2022 – Nov 2023

Dhanush Healthcare Systems

Hyderabad, India

- Built React Native mobile applications serving **30M+ active users annually** across telemedicine, learning, and booking platforms; published 16 production releases to App Store and Play Store.
- Shipped Personal Health ID: patients enter a single identifier and authorized doctors retrieve full patient history, powering **150K+ teleconsultations annually** for rural and underserved communities.
- Built 60+ modular React/TypeScript components and integrated 150+ REST APIs; implemented 35+ Firebase deep-linked Redux navigation flows and GitHub Actions CI/CD.
- Achieved 80% faster TAT via memoization and 70% faster UI via lazy async loading; scaled SFU-based WebRTC video from 200 to 5,000+ concurrent users.

iOS Developer Volunteer

Feb 2026 – Jun 2026

Streetcare

Remote

- Shipped Swift/SwiftUI features for a production iOS app; integrated Firestore and CoreData; participated in code reviews and release management via App Store Connect.

Graduate Teaching Assistant, Algorithms & Data Structures

Jan 2025 – Dec 2025

University of Central Missouri

Warrensburg, MO

- Mentored 50+ students and evaluated 500+ implementations for correctness and complexity.

TECHNICAL SKILLS

AI / LLM: OpenAI / Claude API, Agent Orchestration, RAG, Tool Calling / MCP, LangGraph, Prompt Engineering, LLM Evaluation, Vector Databases

AI Dev Tools: Claude Code, Cursor, GitHub Copilot

Languages: TypeScript, JavaScript, Python, Swift, Java, C++, SQL

Frontend: React, Next.js, React Native, SwiftUI, Tailwind CSS, Web Accessibility

Backend: Node.js, Express, FastAPI, Flask, GraphQL, Microservices, Auth0, Stripe, Plaid

Databases: PostgreSQL, Supabase, MongoDB, Neo4j, Firebase, Redis, MySQL

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, Serverless, CI/CD

PROJECTS

- resume-creator Skill** | *Python, Claude API, MCP, LangGraph, RAG* | github.com/pavan-sai-ch/resume-creator-skill

2026
- Production AI agent with RAG retrieval, MCP tool interfaces, LangGraph orchestration, and eval pipelines. Open-source.
- volumeMixer** | *Swift, SwiftUI, Core Audio (CATap), macOS* | github.com/pavan-sai-ch/volumeMixer

2026
- macOS menu bar utility for per-application volume control using low-level Core Audio Tap APIs. Zero dependencies, open-source.
- The Daily Wag** | *React, Node.js, PostgreSQL, AWS S3, Docker, JWT* | github.com/pavan-sai-ch/daily-wag-frontend

2025
- Consumer platform built from scratch: scheduling logic, admin analytics across 200+ products, loyalty-based pricing, zero-downtime CI/CD.
- C3-Carpool Connect** | *React, Flask, MongoDB, PostgreSQL, CI/CD* | github.com/pavan-sai-ch/carpool-frontend

2024
- Real-time ride-sharing platform with geo-spatial matching; sub-second latency; 99.9% uptime on automated CI/CD.

EDUCATION

- M.S. Computer Science** | **GPA: 3.8 / 4.0**

University of Central Missouri

Jan 2024 – Dec 2025
Warrensburg, MO
- B.Tech. Computer Science & Engineering** | **GPA: 3.75 / 4.0**

Jawaharlal Nehru Technological University

Aug 2019 – Jul 2023
India
