

PAVAN SAI CHILUKALA

Kansas City, MO | pavansai.ch@outlook.com | +1 (816) 226-7274 | linkedin.com/in/pavanchilukala | github.com/pavan-sai-ch | pavanchilukala.vercel.app

PROFESSIONAL SUMMARY

Full-stack and mobile software engineer with professional experience building and shipping web, mobile, and AI-integrated applications. Proficient in TypeScript, JavaScript, Swift, Python, React, React Native, Node.js, PostgreSQL, MongoDB, Docker, and AWS. Currently volunteering as iOS Developer at Streetcare, a non-profit helping homeless communities. M.S. Computer Science (GPA 3.8, December 2025). Actively uses Claude Code, Cursor, and GitHub Copilot as core daily tools. On OPT, open to relocate anywhere in the US. Available immediately.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Swift, Python, Java, C/C++, PHP, SQL
Mobile: React Native, SwiftUI, Expo, iOS (App Store), Android (Play Store), Core Audio (CATap)
Frontend: React, Next.js, Vite, Redux, Tailwind CSS, Bootstrap, HTML5/CSS3
Backend: Node.js, Express.js, Flask, FastAPI, REST API Design, RESTful API Integration
Databases: PostgreSQL, MySQL, MongoDB, Cassandra, Neo4j, Firebase, Firestore
AI / ML: OpenAI API, Anthropic Claude API, LLM Integration, Prompt Engineering, PyTorch, NLP, LangGraph
Visualization: D3.js, Plotly, Matplotlib, Tableau
Cloud & DevOps: AWS S3, GCP, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Vercel, Render
AI Dev Tools: Claude Code, GitHub Copilot, Cursor, ChatGPT, Gemini
Tools: Git, GitHub, Postman, Xcode, VSCode, PyCharm, WebStorm, Linux (Ubuntu)

WORK EXPERIENCE

Streetcare Remote
iOS Developer Volunteer Feb 2026 – Present

- Building and shipping new features and resolving bugs in a production Swift and SwiftUI iOS application used by field workers supporting homeless communities across the US.
- Integrated Firestore for real-time cloud sync and CoreData for local persistence; performing technical root cause analysis, peer code reviews, and release management via App Store Connect and TestFlight.

University of Central Missouri Warrensburg, MO
Graduate Teaching Assistant – Algorithms & Data Structures Jan 2025 – Dec 2025

- Evaluated 500+ assignments for logical correctness, time complexity (Big O), and algorithmic efficiency across 50+ undergraduate students; provided structured written feedback on pseudocode, flowcharts, and implementation quality.
- Mentored students on optimal data structure selection and scalable system design; collaborated with faculty to develop course content and resolve curriculum conflicts.

Dhanush Healthcare Systems Hyderabad, India
Software Engineer Sep 2022 – Nov 2023

- Built **60+ modular UI components** to enhance frontend scalability; applied memoization and open-source libraries across 30+ existing components achieving **80% faster TAT**.
- Integrated **150+ RESTful APIs** for real-time mobile/backend synchronization with complex state management; used lazy async dynamic loading to achieve **70% faster UI responsiveness**.
- Published **16 application updates** to App Store and Play Store; integrated Google OAuth and leveraged Firebase to create **35+ dynamic deep-linked (Redux) navigation flows**.
- Managed version control and complex merge conflicts in a strict Git-flow environment; designed and implemented CI/CD workflows via GitHub Actions for stable production releases.

PROJECTS

volumeMixer | *Swift, SwiftUI, Core Audio (CATap), macOS* | github.com/volumeMixer 2026

- Built a macOS menu bar utility using low-level Core Audio Tap (CATap) APIs at the hardware abstraction layer with no third-party dependencies; designed from first principles and shipped as open-source.

AI Full-Stack Platform | *React, TypeScript, Node.js, PostgreSQL, AWS, OpenAI, Anthropic* 2025

- Built an end-to-end AI-integrated web application with OpenAI and Anthropic LLM APIs: streaming responses, prompt engineering, tool calls, and agentic workflows; deployed on AWS with CI/CD at **99.9% uptime**.

The Daily Wag | *React, TypeScript, Next.js, Node.js, MySQL, AWS S3, Docker, JWT* | [github/daily-wag](https://github.com/daily-wag) 2025

- Led full-stack architecture of a pet clinic consumer platform; engineered custom scheduling APIs preventing concurrent booking conflicts; built admin dashboard with analytics across **200+ products**; deployed via Docker and CI/CD with zero-downtime releases.

C3-Carpool Connect | *React, TypeScript, Python Flask, PostgreSQL, MongoDB* | [github/carpool-frontend](https://github.com/yourusername/carpool-frontend) 2024

- Built a real-time ride-sharing platform achieving **sub-second matching latency** via optimized geo-spatial queries; maintained **99.9% uptime** via automated CI/CD pipelines on Vercel and Render.

Black Friday Sales Prediction | *Python, PyTorch, ML, NLP, D3.js, Plotly, Matplotlib, Tableau* 2022

- Developed a Python ML model using PyTorch and NLP to analyze customer behavior patterns; built interactive dashboards using D3.js, Plotly, Matplotlib, and Tableau for non-technical stakeholders.

EDUCATION

University of Central Missouri

Master of Science, Computer Science | GPA: 3.8 / 4.0

Warrensburg, MO

Jan 2024 – Dec 2025

Jawaharlal Nehru Technological University (JNTU)

Bachelor of Technology, Computer Science & Engineering | GPA: 3.75 / 4.0

India

Aug 2019 – Jul 2023

CERTIFICATIONS

React Native – The Practical Guide [2023]

Database Design and Basic SQL in PostgreSQL

Intermediate PostgreSQL

Supervised Machine Learning: Regression and Classification

Udemy

Coursera

Coursera

Coursera / DeepLearning.AI
